## „Urban and Suburban Space and Quality of Life – Olomouc City Case Study“

This lecture will be focused on interactions between city centre and its hinterland with emphasis on suburban processes. First part of the study deals with "compact city" concept, delimitation of suburban zone and concept of "local governance". We will try to explain how different functioning of "local governance" affected the morphology of suburbs in the hinterland of the city with examples of positive and negative practises (in the surrounding of Olomouc city). In the second part we will deal with problems of quality of life in urban space, interactions between its objective and subjective dimension. We will consider on this multidisciplinary topic from the geographical perspective using quantitative (multivariate statistical analysis) and qualitative methods. The study will also include typology of urban space from the quality of life point of view and relations between these types and perception of residents of the city.

*Dr. Petr Kladivo (born in 1981) is a post-doctoral researcher at the Department of Geography, Faculty of Science of Palacky University in Olomouc (Czech Republic). He is specialized in using of statistical methods in geography, quantitative geography and geographic modelling, urban geography and geography of borderlands. His publications include: Ziener, K., Kladivo, P., Ptáček, P., Roubínek, P., Ruidisch, R. (2012): Auswirkungen historischer Entwicklungspfade auf die Wahrnehmung von und in Grenzräumen und die grenzüberschreitende Zusammenarbeit – Beispiele aus dem österreichisch-slowenischen und dem tschechisch-polnischen Grenzraum. Mitteilungen der Österreichischen Geographischen Gesellschaft; Kladivo, P., Ptáček, P., Roubínek, P., Ziener, K. (2012): Czech-Polish and Austrian-Slovenian borderland – similarities and differences of development and typology of regions. Moravian Geographical Reports; Kladivo P., Halás M. (2012): Quality of life in an urban environment: A typology of urban units of Olomouc. Quaestiones Geographicae; Halás, M., Roubínek, P., Kladivo, P. (2012): Urbánní a suburbánní prostor Olomouce: příspěvek k vymezení, správě a typologii. /Urban and suburban space: contribution to delimitation, management and typology/ Geografický časopis; etc.*
